

VEGA SPACE QB

straight lines enhancing the display of the goods

VEGA SPACE QB LG / HG

Modern look straight glass design serve-over counter with enlarged exposition space, suitable for a wide variety of products. Ventilated circulation of chilled air ensures even cooling throughout the whole product display area without drying out the product on display. The evaporator is located in the back wall of the counter, ensuring easy maintenance, liftable front glass makes it easy for the store staff to access and tidy the counter.

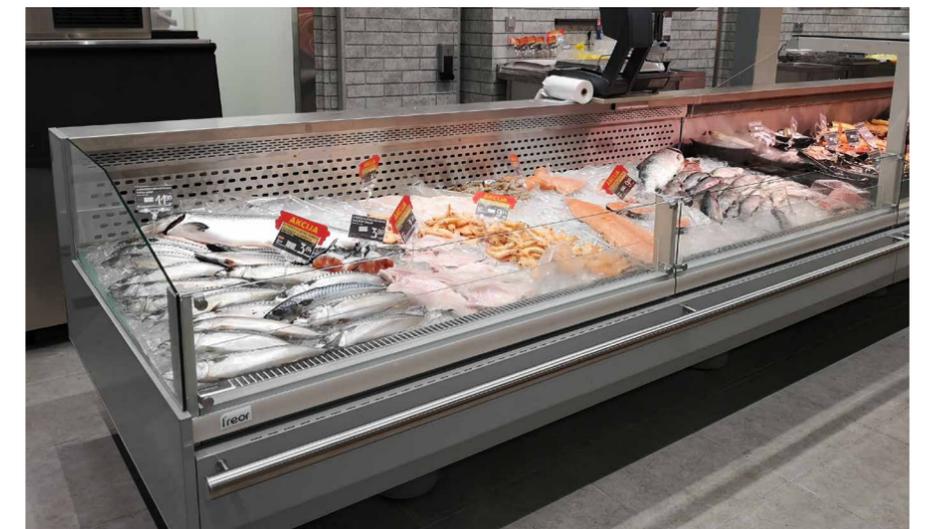

OPTIONS:

- | Low glass design for self-service
- | Organic glass doors in high glass design
- | Galvanized steel or stainless-steel display surface
- | LED lighting in high glass design
- | Stainless-steel bumper
- | Electronic defrost heater

KEY BENEFITS:

- | Enlarged display surface
- | Wide choice of colors for the exterior and interior (RAL palette)
- | Possibility to lift the bottom of the counter to clean and tidy it
- | Stainless-steel bumper
- | Multiplexable device
- | Strong tempered glass
- | Liftable front glass
- | Panoramic endwalls
- | Protection against glass fogging
- | Even allocation of cool air throughout the whole area
- | Energy saving electronically commutated fans
- | Electronic control panel
- | Thermometer (solar powered or electronic)
- | Polyurethane thermal insulation CFC free

VEGA SPACE QB HOT BM

Modern look straight glass bain-marie serve-over counter, designed for an attractive ready-to-eat hot dishes presentation. The heated counter keeps cooked dishes warm while preventing them from drying out. Features include overhead lighting, lower heating and humidification via bain-marie, and electronic water filling. Lift-up front glass makes it easy for the store staff to access and tidy the counter. Gastronomy stainless steel containers of the selected depth are provided. The counter complements Vega Space QB refrigerated display counter model, and looks unanimously when joined into counter lines.
